Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I, Figs 4a-4d and 10a, a connector having the special technical feature of a combination of a protrusion part (162) and impedance compensator (160A);

Species II, Figs. 5a-5d and 10a, a connector having the special technical feature of an impedance compensator with no protrusion part;

Species III, Figs. 6 and 10b, a connector having the special technical feature of a terminal end that is on the same level with the terminal surface;

Species IV, Figs. 7 and 10b, a connector having the special technical feature of a terminal end that is extending beyond the terminal surface;

Species V, Figs, 8a, 8b, and 9a-9c, a connector assembly having the special technical feature of a plurality through holes;

Species VI, Figs. 11a-c, a connector assembly having the special technical feature of a connection to a circuit board including a dielectric ring;

Species VII, Figs. 12a-12c, a connector assembly having the special technical feature of a connection to a circuit board including a dielectric support part (316);

Species VIII, Fig. 13a, a connector assembly having the special technical feature of two connectors connected together with an extendible pin and a aluminum test fixture; and

Species IX, Fig. 14a, a connector assembly having the special technical feature of two connectors connected together with a transmission line.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Claim 1 appears to be generic.

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features as detailed above.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen E. Jones whose telephone number is 571-272-1762. The examiner can normally be reached on Monday through Friday from 9 AM to 5 PM.
